Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

We note the specification does not, @ top of P. 1. claim priority as a 371 case.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 4-7, 12 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6.

Claims 1, 2, 8-10, 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim recites adjustable to about 12,000 to 25,000 Kj/ Kg; thus, no added heat is required; it is not clear when 12,000, when 25,000 is the limit unless one can not determine the difference between 12K and 25K.

The report as declaration would be of value, if the above issue is resolved.

Claims 1, 2, 8-10, 13, 14, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Saur et al Ca 2178655.

The rejection of record is maintained. The declaration does nothing to change the compositions – they are shown by Saur, although evidently not prepared identically. The declaration did not address the full range of Saur's heat application – 110°C p. 7,

Application/Control Number: 09/762,044

Art Unit: 1617

lines 26-031). Saur's range is applicant's & thus at 110 C (p7) would also meet the instant input.

Claims 9, 16, 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, as the amendment of 10/19/04 was not entered..

The rejection of record is maintained on claim 9, and thus dependent claims.

Claim 9 reads "-optionally additive in a fluidized bed-. It is unclear if the fluidized bed is optional, and if the micropores are optional.

Applicant's arguments filed 4/27/04 have been fully considered but they are not persuasive. Applicant argues are to low heat in the closest prior art, and improved efficacy as applied to wax polymer, per declaration, but problems persist the specification also fails to provide any criticality or differentiation between fluidized bed & other coating means (page 30, lines 20-24) previously cited in the art of record. The instant disclosure prefers an operational temperature range of 10-110 C; Saur would meet these also, as p. 5 discloses fluidized bed, or drum, coating with the instant polymers, on a solid carrier, to provide soil-applied CR granules, the instant compositions, & (P 8), the instant method.

The declaration did not address higher values, nor any but the elected wax coating. However, the obviousness rejection is overcome.

Claims 1-3, 8-10, 13-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably

Application/Control Number: 09/762,044

Art Unit: 1617

convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Review of specification fails to elicit any mention of KJ/kg except 6,000 – 25,000 @ page 1; there is no support examiner can find for any other values.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Neil Levy whose telephone number is (571) 272-0619. The examiner can normally be reached on Tuesday through Friday 7 AM to 5:30 Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on (571) 272-0602. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
